SUFFERING FROM BACK PAIN?

Get Relief Today!

Non-invasive • Drug-Free • Immediate Relief

(((SLEEQ)))
spinal • therapy • system

You're not alone

Experts estimate that as much as 80% of the population will experience a back problem at some point in their lives.¹ In fact, back pain is the second most common reason for visits to the doctor and one of the most common reasons for missed work.

When back pain occurs

The lower back (lumbar spine) carries the weight of the head and torso, making it the most common site of pain. The increased stress in this area can lead to injury or degeneration from wear and tear. In the upper back (thoracic spine), postural issues and fractures can occur as a result of age or osteoporosis.

Back pain treatment

Spinal braces are widely utilized to provide safe, immediate pain relief and the support needed to restore functional mobility.^{2,3} Additional treatment options are available such as medication, therapy, injections, and surgery. Many find that a combination of these therapies provide the desired relief. It's important for one seeking back pain relief to consider the risks or side effects of each treatment option, including drug dependency. A back brace may be right for you.

Ask your doctor if the SLEEQ back brace is right for you and experience pain relief today.

World's most advanced spinal compression braces.

Proven Pain Relief

Spinal braces improve function, muscle strength and posture, while reducing pain and the need for medication.^{3, 4}

Comfortable & Easy-to-Use

Walking, standing or sitting, the advanced tightening mechanism easily adjusts for optimal compression and comfort.

Lightweight Low-Profile

Ultra-lightweight and easy to wear discreetly under clothing.

Breathable

Stay cool & dry with breathable materials and ventilated support panels.
