

Physical Therapy Webinar: Free CEU Course

Orthotic Management of Abnormal Pathological Gait Course

Management of Pathological Gait with AFO intervention

Evaluation Criteria

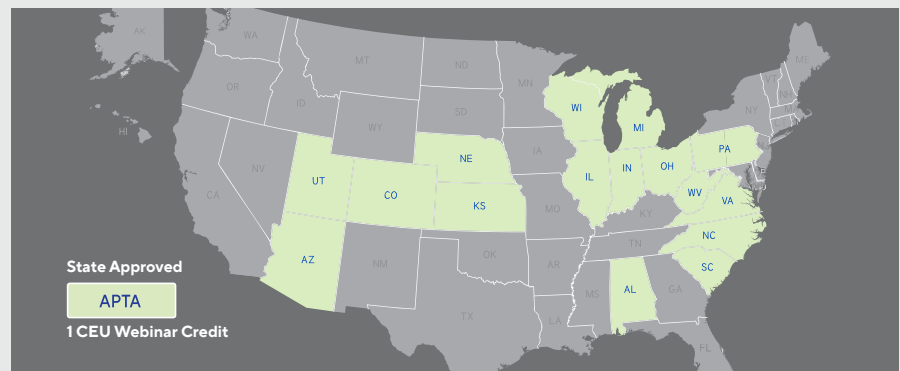

Bracing Options

Course Description:

Participants will become familiar with advanced types of orthotic devices like composite AFOs and gain in-depth understanding for evaluating and treating patients with lower limb pathologies that are secondary to neuromuscular conditions. PTs will be presented with the appropriate guidelines and procedures to insure the proper fit and application for bio-mechanical goals.

Check your state's APTA CEU status:

**We are in the process of adding additional states. If yours is not yet approved, you can "self-submit" to your state although APTA credit is not guaranteed.*
