

Stat-A-Dyne™ Ankle

Stat-A-Dyne™ Ankle

Core Technologies

- Three modalities for tissue elongation (*static progressive, dynamic, & dual function*)
- Bi-directional hinges
- Circular hinge for terminal range of motion
- Light-weight and rigid aircraft aluminum maintains anatomical alignment

Feature Benefit

- Ankle ROM: Dorsiflexion 40°
Plantar flexion 50°
Inversion 40°
Eversion 30°
- Off the shelf and custom cuffs for maximum soft tissue capture
- Posterior radius prevents heel breakdown
- Bilateral use capability
- Anti-skid pad for stand-pivot-transfers
- Maintains hip in neutral alignment

Indications

- Fracture & Dislocation
- ORIF
- Crush Injury
- CVA/TBI
- Joint Arthroplasty
- Tendon & Ligament Repair
- Burn
- Closed Manipulation
- Other Orthopedic and Neurological Conditions
