

Stat-A-Dyne™ ESP Slider

Stat-A-Dyne™ ESP Slider

(Elbow-Supination-Pronation)

Core Technologies

- Three modalities for tissue elongation (*static progressive, dynamic, & dual function*)
- Bi-directional hinges
- Circular hinges for terminal end range of motion
- Light-weight and rigid aircraft aluminum maintains anatomical alignment
- Slider technology prevents joint compression & point loading

Feature Benefit

- Infinite ROM eliminates device bottom out in supination and pronation
- Elbow ROM from -45° hyperextension to 150° flexion
- Counterforce bracket provides 3 point lever arm maintaining joint alignment
- Only device capable of treating extension, flexion, pronation and supination.
- Bivalved or segmented Kydex cuffs maximize soft tissue capture and comfort
- Adjustable carrying angle

Indications

- Fracture & Dislocation
- ORIF
- Crush Injury
- Radial Head Fracture
- Joint Arthroplasty
- Tendon & Ligament Repair
- Burn
- Closed Manipulation
- Other Orthopedic and Neurological Conditions
