## OA Knee Orthosis

Provides comfortable offloading and pain relief for mild to moderate medial or lateral unicompartment osteoarthritis

- 3D Printed Custom Ultralight knee brace - weighs less than a 1lb.
- Latest 3D scanning technology provides a precise and intimate fit
- Multiple frame thickness and length options
- BOA Stiffness Adjustment System - allows patient to achieve perfect fit and support while enhancing suspension
- Not recommended for severe medial or lateral OA or extreme varus/valgus angles

## BOA® stiffness adjustment system

The integrated patented BOA dial system, recognized worldwide for its reliability and durability, allows the user to precisely adjust the stiffness of the brace. This allows the patient to achieve a perfect fit of correction and support, while limiting migration.
