

THUASNE

## Stat-A-Dyne™ Elbow Slider

**Recommended for** *Fracture & Dislocation / ORIF / Crush Injury / Radial Head Fracture / Joint Arthroplasty / Tendon & Ligament Repair / Burn / Closed Manipulation / Other Orthopedic and Neurological Conditions*

### Core Technologies

- Three modalities for tissue elongation (static progressive, dynamic, or dual function)
- Bi-directional hinge for flexion and extension
- Circular hinge for terminal end range of motion
- Light-weight and rigid aircraft aluminum maintains anatomical alignment
- Slider technology prevents joint compression and point loading

### Feature Benefit

- Elbow ROM from  $-45^{\circ}$  hyperextension to  $150^{\circ}$  flexion
- Counterforce bracket provides 3 point lever arm maintaining joint alignment
- Bivalved or segmented Kydex cuffs maximize soft tissue capture and comfort
- Forearm cuff crosses wrist joint to prevent point loading
- Adjustable L-bracket maximizes patient comfort
- Adjustable carrying angle
