

Stat-A-Dyne™ Knee Slider

Recommended for Joint Arthroplasty / Meniscus Repair / Tibial Plateau Fracture / Tendon & Ligament Repair / ORIF / Burn / MUA / Meniscectomy / Other Orthopedic and Neurological Conditions

Core Technologies

- Three modalities for tissue elongation (static progressive, dynamic, & dual function)
- Bi-directional hinge for flexion and extension
- Circular hinge for terminal end range of motion
- Light-weight and rigid aircraft aluminum maintains anatomical alignment
- Slider technology prevents joint compression & point loading

Feature Benefit

- ROM: -30° Hyperextension to 150° Flexion
- Bivalved or segmented Kydex cuffs maximize soft tissue capture and comfort
- Adjustable valgus/varus to accommodate male/female alignment
- Tibial tuberosity counterforce bracket provides 3 point lever arm maintaining joint alignment
- Long lever arm facilitates surface area distribution
- Foot/ankle cuff maintains anatomical alignment and provides 2 joint stretch
